Inaugural Speech

by Mr. Joe Biden, 46th President of the United States

I am more than grateful to stand here before you and give this speech, as we are about to witness a major development. We all fought very hard, and our moment is now. No matter who voted for me and who didn't in America, we are all equal. I will fight for every single one of you. Women or Man, we are all Americans, and we all may to live here as free and healthy people. Not only am I thankful for the ones who voted but also the ones who counted the votes and believed in our future, you made all this come true and you deserve a special thank you.

We didn't back down, and we won't, we have a few battles, which we have to face in the near future but if we work together, there is nothing that we cannot to conquer.

As we all know, coronavirus is a major factor that had a huge impact on our lives this year. Therefore, on January 20th 2021 we will start with our programme, and we will establish public health centers, where everyone will get the help they need. In fact, I believe that healthcare should be affordable for every American citizen and the expansion of the Obamacare is the key.

During these few months we witnessed a lot of hatred and violence in America nevertheless there is no place for these factors, additionally we do not cosset dictators, and there is definitely no place for racism or inequality. Hence, there should be no additional funds for the police, there are many other social services that could use the help, for example mental health facilities.

I am aware of the racial injustice, and the struggles many African Americans had to go through, yet you had my back during this election, and I will have yours. With this in mind, there will be a fund to support minorities that is a part of my Build Back Better programme. Since a few protests took place, I intend to address racial inequity in the justice system and not only confront but also end white supremacy.

I am thankful for my beautiful wife, who supported me all the way through, and she gave up her time to support me. Marriage is a beautiful revelation to experience, yet not everyone can enjoy a life with their partner. America is about people and gay, lesbians and transgenders are human beings that deserve a chance to live happily ever after. As a result, we cannot carve up America in ethnic groups or sexuality. Let us look at the bigger picture such as building a future together, the future we all deserve, and we all long for.

Moreover, there will be no future, if we won't start acting. Climate change for some a myth and for some sad future. We will undo the previous resolution and rejoin the Paris Climate Accord and address the climate change and its negative impacts.

Additionally, we could reverse more decisions of the former President of the United States. For example, the enormous income inequality, in order to take care of this problem, we could eliminate the tax cuts for the wealthy ones. Restoring the soul of America is my goal, and I want everyone to feel comfortable in the United States of America. This also applies for all Muslims that want to visit our beautiful country and all Mexicans that want to pass the US-Mexican border with no disturbance. We cannot see our neighbors or other nations as our enemies.

America is a strong-willed country and can combat some of its battles on its own, but there are components we cannot fight alone. My job is to ensure your all safety. I do not want to divide anyone but in the contrary unite. This is what progress is all about, we forget the past and think about our future and the future of our kids. In order to keep our children educated, there must be a more affordable way for them to get a good degree. For instance, college and community college should be for free. Twelve years of school are not sufficient, we must secure their future.

It is undoubtedly that the safety of the next generation must be secured. Consequently, gun control has to take place because we are not only putting ourselves in danger, but also everyone who is around us.

It may seem like a pipe dream but I believe in change, and I believe that you feel the same even if I was not your first choice. We are the United States of America and there is no right or left there is only us, stirring the same pot, and it is in our hands which spices we use.
